Sanitation Enforcement, Reservoir
Information, Cleanup Programs,
Winter Water Tips, Emergency
Preparations, and much more!

City Paper
2005 Best of Baltimore
"Best Use of Taxpayer Money"
Department of Public Works Calendar

DEPARTMENTAL OVERVIEW

The Baltimore City Department of Public Works is divided into three bureaus: **General Services, Solid Waste, and Water and Wastewater**. Public Works oversees many boards, commissions and permits. Just over 3,000 employees assure that facilities and equipment for city agencies are maintained, that high quality water is available to metropolitan Baltimore, that residential refuse is collected and that public areas are kept clean.

GENERAL SERVICES

The Bureau of General Services is responsible for the operations and maintenance of city-owned buildings and equipment, including the city's fleet of trucks, cars and emergency vehicles. New construction and renovations of city buildings are coordinated through the bureau.

SOLID WASTE

The Bureau of Solid Waste collects residential trash and recycling from 210,000 homes. It cleans city streets, alleys and publicly-owned lots. The bureau also picks up bulk trash items by appointment; conducts city-wide cleanups; supports community pitch-ins; and coordinates special recycling of household hazardous waste, electronics, Christmas trees and leaves. The bureau maintains a fleet of boats designed to keep the harbor clean.

WATER AND WASTEWATER

The Bureau of Water and Wastewater treats and distributes an average of 265 million gallons of water per day to 1.8 million people in the Baltimore region. It maintains 3,100 miles of sanitary mains that deliver wastewater to two treatment plants: Back River and Patapsco. It is also responsible for 1,000 miles of storm drains and 33,000 storm water inlets. Its three reservoirs - Liberty, Loch Raven and Prettyboy - provide clean, safe water as well as recreational activities in their surrounding watersheds.

SPECIAL MESSAGES

What a great year for the Department of Public Works.

Our streets and alleys are getting cleaner and cleaner due to our successful City/Citizen partnerships.

In 2005 we undertook a massive cleanup of the Middle Branch of the Patapsco River and implemented a regular cleaning program for the waterway.

DPW has made tremendous progress in renewing sewer lines, which will mean cleaner streams and a healthier Chesapeake Bay.

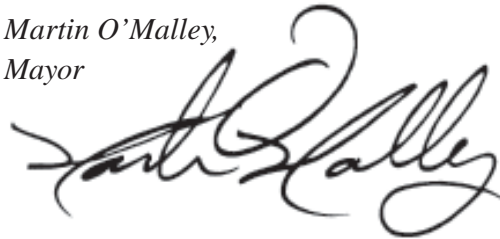

The massive enlargement of the Loch Raven Dam means additional protection of our water supply as well as security for people living downstream.

Use your 2006 Department of Public Works Calendar to note your recycling days, and please recycle.

Be sure to look in the back of the calendar to learn how DPW can work with you to continue to make Baltimore greater and greater.

Let's make 2006 the best year ever.

Martin O'Malley,
Mayor

"Achieving is Working Together" is our motto at the Department of Public Works.

During the last year we have shown how working together with our neighborhoods can bring about positive change.

Through the Community Pitch-In program and the spring and fall cleanups, we have made great strides in removing trash from our streets and alleys.

Renovation work to create the New Lake Montebello is well underway; and you can already see how the open vistas will make it a much more enjoyable place to walk, bike and jog.

Because of our work, Baltimore has been recognized nationally for innovations in saving energy in city-owned buildings.

We are increasing our fleet of alternative-fueled vehicles. We are step-by-step, laying out a new sewer system, which will mean a better environment for us and future generations.

By using the information in this calendar, you will see what we can achieve by working together.

Have a wonderful year.

George L. Winfield,
Director

Note: While this calendar includes a large listing of 2006 events, many of the city's celebration dates and festivals were not included due to space limitations and scheduling. Please note that events and venues may change due to unforeseen circumstances.

*Achieving is
working together*

*Shirley A. Williams, Deputy Director,
Department of Public Works*

*J. Keith Scroggins, Bureau Head,
General Services*

*Joseph Kolodziejski, Bureau Head,
Solid Waste*

*Jay Sakai, Bureau Head,
Water and Wastewater*

Department of Public Works

The Department of Public Works

Mission Statement:

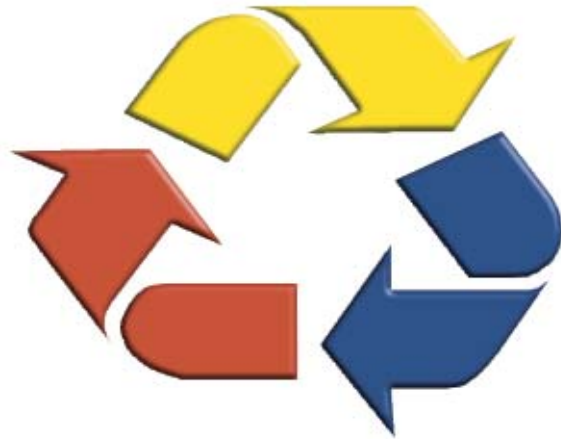

Our mission is to provide outstanding public services for the citizens of Baltimore, our visitors and our neighboring subdivisions, while maintaining a superior infrastructure, guaranteeing a clean and safe environment as well as sustaining a high quality of life.

RECYCLING IN BALTIMORE CITY

TODAY'S TRASH / TOMORROW'S ASSETS

Much of what we are accustomed to throwing away can be easily put to use. A willingness to separate household wastes is all that is required. Aluminum, glass, paper and plastics are the most useful recyclables at present. A simple system of sorting can be easily adapted to everyone's home. Government and community leaders realize that recycling has significant benefits. The most appealing aspect is economic. Resource recovery saves money, creates jobs and conserves our dwindling natural resources. Garbage is a source of valuable assets that can be uncovered by all of us. Purchasing products made from recycled materials helps keep the process successful. By recycling these ordinary throwaways, we can contribute to the wealth and well-being of ourselves and our world. GOOD FOR BALTIMORE! GOOD FOR THE ENVIRONMENT!

2006 RECYCLING CALENDAR LEGEND:

B = Bottles, Cans and Jars (blue bags)

Bottles and cans include: glass bottles, tin cans, metal cans, plastic bottles with  or  (remove all caps). Place bottles, cans and jars in blue plastic bags, and they will be collected citywide every 2nd and 4th Monday of each month. You may use marked containers or bins without lids in place of blue bags.

= Paper

(Please see map below for your paper recycling zone.)

= Household Hazardous Waste Drop-Off

(at Baltimore Polytechnic Institute, Cold Spring Lane and Falls Road, Saturday, April 29, 2006, 9 a.m. - 3 p.m. and Sunday, April 30, 2006, 11 a.m. - 4 p.m. and Saturday, October 28, 2006, 9 a.m. - 3 p.m. and Sunday, October 29, 2006, 11 a.m. - 4 p.m.)

= Christmas Tree Mulching Drop-Off

(at Baltimore Polytechnic Institute, Saturday, January 7, 2006, 9 a.m. - 2 p.m. and Sunday, January 8, 2006, 10 a.m. - 2 p.m.)

H = Holiday

PLEASE SEE MAP FOR YOUR PAPER RECYCLING ZONE'S COLLECTION DAY.

The Paper Recycling Zones and Map

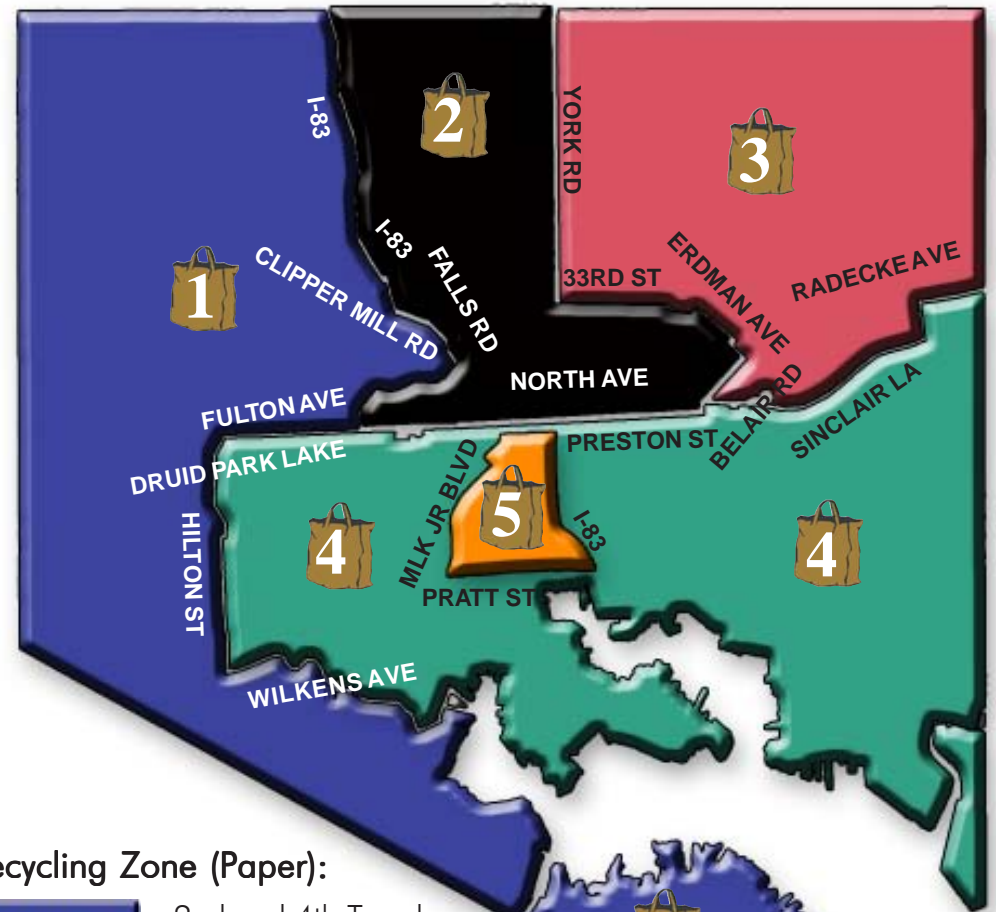

Set out recycling items by 7 a.m. for collection. (Zone 5's paper is an evening collection. Please see map).

If your collection day falls on a holiday, please hold your recycling items until the next scheduled collection day.

Paper includes: white/colored paper, cardboard, newspaper, magazines, folders, tab cards, books, catalogs, phone books, envelopes. Please remove all paper clips and rubber bands. When recycling paper, either tie in bundles, place in bundles, or place in paper bags or cardboard boxes.

For additional information, please dial 311.

BEING RESPONSIBLE

Working together is the key to a successful city. The following information outlines the responsibilities of DPW and your responsibilities.

Department of Public Works:

- Collects your residential trash, recycling (paper, plastic, glass and cans).
For information on your regular trash schedule, call 311.
- Collects your bulk trash when you schedule an appointment through 311.
- Enforces the sanitation laws of the city.
- Collects and recycles bagged leaves on your second trash collection day (seasonal).
- Removes fire debris from the public right of way.
- Provides tools for community cleanups.
- Removes graffiti.
- Removes and stores eviction items.
- Takes care of water pipes and sewer lines up to and including the water meter.

Your Responsibilities:

- Keep your property clear of trash and well-maintained.
 - a. Clean your sidewalk and alley and along your curbs.
 - b. Trim the trees and shrubs on your property and cut your grass.
 - c. Weed and care for trees in the sidewalk; clean trash from the tree boxes.
- Bait for rats on your property and rat-proof your house.
- Report illegal dumping, abandoned vehicles and other criminal activities.
- Participate in neighborhood cleanups.
- Use durable trash cans with tight-fitting lids.
- Do not put your trash out too early.
- Maintain water lines from the meter to your house as well as sewer lines on your property.
- Do not use your sink or toilet to dispose of grease, rags, paper towels or other foreign objects. These will clog your drain and the city's sewer lines.
- Do not open fire hydrants. It is illegal, dangerous and can hinder firefighting. Report open hydrants by calling 311.
- **Do not hesitate to call 311 if you need assistance or have a question.**

KEEPING BALTIMORE CLEAN

A. Bulk Trash Pickup

Every month, Baltimoreans can place up to three items out for collection. One day per month is set aside for this collection. All citizens have to do is call 311 and tell us:

1. Your address
2. Your telephone #
3. What three items

Call us three or more working days before your scheduled date. Your bulk trash day remains the same in 2006. If you do not know your day, please call 311.

B. Dropping off Debris

The City of Baltimore, through the Department of Public Works, provides our residents with five locations around the city where they may dispose of waste materials including e-Cyclables, FOR FREE.

These locations are open to residents from 9:00 a.m. to 5:00 p.m. Monday through Saturday.

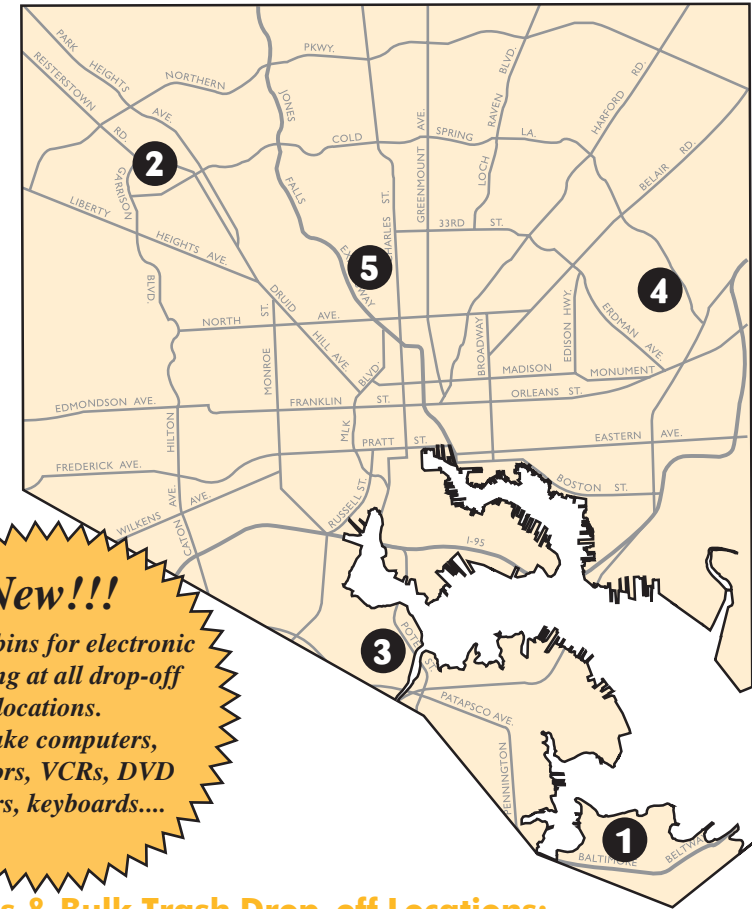

Residents bringing materials for disposal in their personal vehicle, including unmodified pickup trucks rated 3/4 ton or less, simply show proof of residency to access this free service. Commercial vehicles must be registered as small haulers and go to Quarantine Rd. Sanitary Landfill.

C. Community Cleanups

City government cannot keep Baltimore clean without the help of citizens and visitors. Mayor O'Malley made it clear from his first day in office that improving the cleanliness of Baltimore is one of his top priorities. Baltimoreans have responded by joining DPW in a variety of special cleanup operations over the last six years. The results are dramatic!

If we each take responsibility for our own trash and utilize the services provided by the city, we can have a cleaner Baltimore.

Thank you for keeping Baltimore Clean!

Debris & Bulk Trash Drop-off Locations:

- | | |
|---|---|
| 1 Quarantine Rd. Sanitary Landfill
6100 Quarantine Road | 4 Eastern Sanitation Yard
6101 Bowleys Lane |
| 2 NW Transfer Station
5030 Reisterstown Road | 5 NW Sanitation Yard

| 3 Western Sanitation Yard
701 Reedbird Avenue | |

TRASHING BALTIMORE IS A CRIME

ADDITIONAL ENFORCEMENT

Citations are also issued by special enforcement officers from the departments of Health, Housing and Community Development (HCD), Police and Fire.

WHAT TO DO IF YOU RECEIVE A CITATION

Never ignore a citation. It is a legal document and must be answered in one of two ways:

1. Pay the penalty indicated on the citation; or
2. Appear at the Environmental Control Board.

If you choose to appear in person, your hearing may take several minutes or several hours, depending on the hearing docket.

Failure to answer the notice of violation in one of the said two ways before the due date indicated on the citation may subject you to significantly higher penalties.

VIOLATIONS & FINE AMOUNTS

Fines can range from \$50 to \$500. Examples include having high grass and weeds, putting trash out on the wrong day, having no trash cans, littering, having abandoned vehicles and leaving dog feces on your property.

ENVIRONMENTAL CONTROL BOARD

The Environmental Control Board (ECB) was created by City of Baltimore Ordinance 98-326, signed into law on June 22, 1998. The ordinance specifies the violations for which the citations may be issued and the amount of the pre-payable fine. The citations are generally related to the enforcement of certain sanitation, environmental health and safety laws.

WHO?

The ECB has 13 members:

- 5 are from city agencies: Public Works, HCD, Health, Police and Fire;
- 5 are environmental experts who make up the board's scientific panel;
- 2 are from the general public; and
- 1 is a member of the Baltimore City Council.

WHAT IT DOES

The ECB holds hearings for all environmental violations. All cited parties give statements regarding their guilt or innocence. The ECB hearing officers will then issue a judgment, based on Baltimore City's Environmental Codes, to sustain the violation, pay the fine or dismiss.

**Photo of: Myra Peoples
Sanitation Enforcement Officer
Bureau of Solid Waste
DPW**

SANITATION ENFORCEMENT

Sanitation Enforcement was established in 1997 to crack down on violations of Baltimore's sanitation laws.

HOW?

Citations are issued by Sanitation Enforcement Officers. Citations can be issued to property and business owners, tenants and anyone else who violates Baltimore's sanitation laws.

STOP ILLEGAL DUMPING

WHAT IS ILLEGAL DUMPING?

Illegal dumping is disposal of waste in a prohibited area. It is also referred to as “open dumping,” “fly dumping” and “midnight dumping” because materials are often dumped in open areas from vehicles along roadsides and late at night. These materials typically include:

- Construction and demolition waste such as drywall, roofing shingles, lumber, bricks, concrete and siding
- Abandoned automobiles, auto parts and scrap tires
- Appliances or “white goods”
- Furniture
- Yard waste
- Household trash
- Medical waste.

If not addressed, illegal dumps often attract more waste including hazardous materials.

WHO ILLEGALLY DUMPS WASTE?

It is difficult to profile a “typical” illegal dumper; however, offenders can include:

- Construction, demolition, remodeling, roofing or landscaping contractors

- Waste management companies or general hauling contractors
- Operators of transfer stations or junkyards
- Automobile repair or tire shops
- Scrap collectors
- Local residents and “do-it-yourselfers.”

WHY IS ILLEGAL DUMPING A PROBLEM?

- **Health Risks:**
Dump sites attract rodents, insects and disease-carrying mosquitoes.
- **Fire Hazards:**
Dump sites have caught fire due to spontaneous combustion or, more commonly, by arson.
- **Flooding:**
Illegal dumping can obstruct proper drainage of run-off when wastes block ravines, creeks, culverts and drainage basins.
- **Negative Impact on Plants and Wildlife:**
Open burning at dump sites can cause forest fires and severe erosion as fires burn away trees and undergrowth.
- **Contaminate Wells and Surface Water:**
Run-off from dump sites that contain chemicals can contaminate sources of drinking water.

Decrease in Property Values:

Dump sites serve as magnets for additional dumping and other criminal activities resulting in a less livable environment.

Cost of Cleanup:

The costs of continuous clearing of illegally dumped waste materials are significant. Some urban areas have reported spending several million dollars per year on cleanup, hauling and disposal activities associated with illegal sites.

GET INVOLVED!

Community awareness is important in preventing illegal dumping. Here are some ways to FIGHT BACK!

- Get description of vehicle(s) and person(s), time of day and license tags.
- If you see people dumping trash illegally, call 911. To report the results of illegal dumping, call 311.
- Do not take action yourself!
- Never approach an illegal dumper in the act.
- Do not go near any large drums or liquids that have been dumped.
- Educate your neighbors on what can be done to prevent illegal dumping.
- Organize neighborhood cleanups.

PREPARE FOR EMERGENCIES AND COLD WEATHER

IN CASE OF EMERGENCY:

Various city agencies work together to respond to emergency situations. These could range from floods and snowstorms to hurricanes and even to terrorist attacks. You should be prepared with an emergency kit. Be sure to have these supplies on hand to cope with any weather or other emergency:

Heating oil	Flashlights	Medicine	Portable radio	Corded phone	Plastic tarp
Extra, fresh batteries	Blankets	Bottled water	Canned foods	Manual can opener	Duct tape

Keep a cash supply ready to be used in case ATMs or banks are unavailable.

Remember! During an emergency, keep phone lines clear! Nonemergency calls will tax the communication system and may interfere with responses to life-threatening situations!

In case of an emergency, please tune to your local radio or television station for information. If evacuation is ordered and if time allows, be sure to take important documents and medical information with you including:

- Driver's license or personal identification
- Social Security card
- Proof of residence (deed or lease)
- Insurance policies
- Birth and marriage certificates
- Wills, deeds and copies of recent tax returns
- Contracts, stocks, bonds and other negotiable certificates
- Passports and immunization records
- Bank account numbers
- Credit card account numbers
- Inventory of household goods
- Important telephone numbers
- Medical records, health insurance cards and prescriptions.

Around the house when the temperature plunges:

Keep a pencil-thin flow of water running from pipes to avoid freezing.

Empty water from garden hoses.

Turn off water to outside faucets.

Clear snow from fire hydrants and storm drains.

Use emergency numbers for actual emergencies only.

Do not shovel snow in the street.

Assist your elderly and disabled neighbors.

Bring your pets inside.

Call 911 **only** for life-threatening or property-damaging emergencies!

Call 311 for all other concerns.

Life saving facts:

Check smoke detector batteries.

Avoid carbon monoxide poisoning!

Have your furnace professionally cleaned and inspected.

Maintain proper ventilation in your vehicle.

Do not use your oven or kerosene stoves for heat.

Do not use portable generators in your house.

WINTER WATER TIPS

Guard Against Cold Drafts

Since most water meters and pipes are located in unheated areas, they are vulnerable when temperatures dip below freezing. Even a small draft of cold air through a cracked basement window, window sill, or foundation during extremely cold periods could cause freezing conditions. Without ample heat, over time, the cold can even penetrate a well-insulated wall.

If your pipes are in a closed location, leave a door to a heated room open to warm the area. You should also:

- Repair broken or cracked windows and walls.
- Replace standard windows in your basement with storm windows.
- Close tightly all windows and doors to the outside.
- Insulate outside walls.
- Eliminate drafts from crawl spaces.
- Periodically monitor your sump pump.
- Keep bottled water on hand.
- Report water main breaks, leaking hydrants or exterior water leaks to our One Call Center by dialing **311**.

Prevent Problems

Frozen water meters and household pipes can freeze you out of water service and can be expensive to repair or replace. Before it gets any colder, take preventive steps to protect your water meter and pipes from freezing and check them frequently during cold periods. If you plan to vacation during the cold weather months, be sure to ask a friend or family member to check your home periodically while you are away.

Protect Your Water Pipes

Water inside pipes can freeze when temperatures drop. If water lines do freeze, it is the resident's responsibility to have them thawed or repaired. Protect pipes now by insulating them and outside walls and by providing a source of heat. For example, if your kitchen sink is installed against an outside wall, insulate the wall and open the cabinets underneath the sink to allow warm air to reach the pipes. Take the following additional precautions:

- Check the temperature near your pipes frequently during cold periods. (Remember, cold settles near the floor and along the walls, so place the thermometer close to the pipe for an accurate reading.)
- Remove water hoses from outside connections.
- Turn off the water to outdoor faucets and drain the pipes. Frozen water lines or pipes inside your home can begin with a frozen outside faucet.
- Allow water to trickle from a faucet at the lowest point in your basement to prevent pipes from freezing.

When Meters and Pipes Freeze

Don't panic if your water meter or pipes freeze. First, open a faucet near the meter or frozen pipes to release any vapor from melting ice. You'll know if the ice is melting when water begins to run through the open faucet. You should be familiar with the location of your main water shutoff valve and individual sink valves so you can quickly turn off the water if a pipe does burst.

Baltimore City residents can dial **311** to request assistance with a frozen water meter. An inspector will be assigned to come out, assess any possible complications and make corrections or give proper recommendations. However, if your pipes freeze, please contact a plumbing professional for assistance. Baltimore City is not responsible for the maintenance or repair of household pipes.

PROTECTING OUR RESOURCES

Protecting our urban streams

The City of Baltimore has embarked on a comprehensive effort to improve the quality of its urban streams, beginning with a 14-year, \$900 - million effort to rehabilitate Baltimore's aging sanitary sewer system. When completed, this construction program will eliminate one of the significant sources of stream pollution - sewage overflows.

Baltimore has several major environmental initiatives currently underway. These include new debris collectors along the Gwynns Falls which remove trash that is carried into the streams after heavy rains. Stream restoration projects along the Stony Run will reduce sediment and other pollutants that result from erosion. Collaborative efforts such as Watershed 263 bring community groups, Parks and People and other private organizations together to reduce run-off pollution in urban neighborhoods. These projects will result in a cleaner and safer natural environment for all Baltimoreans.

Citizens are encouraged to become active partners in the effort to improve the health of our urban streams by getting involved in one of the many grassroots organizations that help us monitor and clean up our watersheds. You can help educate your neighbors about water quality issues and best management practices. You can make a difference by using environmentally friendly practices in your daily life. Appropriately dispose of household hazardous wastes. Clean litter in the streets before it is washed into storm drains and streams. Discard pet and yard waste in an acceptable manner. Dispose of grease properly to prevent sewer backups. And please make sure that household plumbing is in good working condition.

Protecting the Chesapeake

Since the mid 1980s, Baltimore has led the region's efforts to improve the health of the Chesapeake Bay by investing over \$500 million into new nitrogen and phosphorus reduction facilities at our two wastewater plants - Back River and Patapsco. Biological Nutrient Removal (BNR) facilities at the Back River plant remove up to 70% of the nitrogen and 96% of the phosphorus from the effluent. Suspended matter and dissolved organic matter (respectively termed Total Suspended Solids and Biochemical Oxygen Demand) are both removed at rates in excess of 98%.

The Baltimore City has initiated two new projects that will further reduce nutrient concentrations to the current limit of technology. Enhanced Nutrient Removal facilities (ENR) are under design at Patapsco. This project, which is estimated to cost over \$150 million, will keep millions of pounds of additional nitrogen from entering the Chesapeake Bay. A similar effort to construct state-of-the-art facilities at Back River is also underway.

DPW will continue to lead in the regional endeavor to improve the health of the Bay.

Dwayne Duck

DRAIN DETECTIVE in

"The Case of the Missing Furball"

It was a beautiful Sunday afternoon. I was taking my swim at Loch Raven. (Hey I can - you can't - because I'm a duck.)

The cell phone buzzed.

"Dwayne Duck, Drain Detective here."

"Meowwwwwww!"

Drat, I hate cats!, after all, I am a bird!

Then a woman screamed, "Help!"

Horried, I too screamed, "YOU need help Ma'am! Don't you know what cats do to ducks? What's he doing? Clawing you?"

"No, no Fluffy wouldn't do that."

"Fluffy - hah - why is it always Fluffy!" I thought.

"My poor Fluffy, he's covered with cat shampoo, and the sink is clogged. I'm afraid to run more water to rinse him, and he is suffering terribly."

"EXCELLENT!" - I thought.

"Where are you?" I asked.

"Reservoir Hill," she said.

Drat, I knew then I should have gone to Druid Lake for my swim.

I flew over, all the time wishing I had a chair and a whip with me.

The furry monster was in the tub with its fangs showing.

"Ma'am, you have taken no steps to prevent hair from going down your drain. There is no trap over your drain hole."

"I had one there," she said, "but it kept getting covered with hair."

I was about to quack up at her comment.

"Ma'am, why didn't you just remove the hair and throw it in the trash?"

"I, I, I wasn't thinking. What should I do now?"

"Get a plunger and put the trap back. Keeping hair and other debris out of your drains helps you and helps keep the city's drains from clogging.

"Oh, and Ma'am - get a dog for Fluffy."

- CLOGGED PIPES CAN FLOOD YOUR HOUSE WITH DIRTY WATER.
- NEVER PUT THINGS DOWN THE DRAIN THAT DON'T BELONG THERE.
- SWEEP YOUR SIDE-WALKS AND GUTTERS AND DON'T LITTER. TRASH MAY GO INTO THE STORM DRAINS AND THEN TO OUR RIVERS AND STREAMS.
- DO NOT PUT GREASE IN THE SINK. IT CAN CLOG PIPES.
- BALTIMORE IS PUTTING IN NEW PIPES TO STOP SEWER SPILLS.
- NEW PIPES WILL MEAN CLEANER STREAMS.
- WORKING TOGETHER MEANS A BETTER CHESAPEAKE BAY.

RAT CONTROL PROGRAM

Responsibility for the Rat Control Program is with the **Baltimore City Health Department**. Rat infestations are largely due to unsanitary practices which provide them with food and shelter. Historically, rats have caused major public health problems: plague, disease and bites which are sometimes fatal to children. Their gnawing creates holes that damage your property, exposes electric wiring and destroys your home. Rat infestation lowers property values and the quality of life in your community. Rats eat nearly everything, especially garbage. Note: Rat Control cannot treat your property if it has excessive trash, bulk or high grass and weeds. **Can your trash, clean your yard and help us starve out rats!**

Use This Checklist To Make Sure Your Property Is Rat-proof!

- ☐ The Baltimore City Code states that you must use **durable** trash containers with **tight-fitting lids**.
- ☐ **Remove** leftover pet food from your yard after each feeding.
- ☐ **Remove** dog manure each day from your yard. **Dispose** in plastic bags then place in trash can. Rats eat dog manure.
- ☐ **Remove** bird food from the ground. Bird feeders should have high sides and a catch tray.
- ☐ **Mow** tall weeds and grass.
- ☐ Don't give a rat a place to hide. **Elevate** lumber or building material at least 18 inches above the ground.
- ☐ **Remove** junked furniture, vehicles and appliances from your yard. They provide a home for rats.
- ☐ **Don't** give rats access to your home. **Close** holes in windows, doors, screens and openings around pipes. **Cut** tree branches hanging over your house.
- ☐ Use **only** grass, flower cuttings and leaves in compost piles, **not** food scraps, trash or garbage.
- ☐ Vegetable gardens should be **free** of grass, weeds, rotten fruits and rotten vegetables. **Tie** fruit and vegetable vines to stakes. When left to grow on the ground, they provide food and shelter for rats.

These Are Signs of Rats In Your Home And Yard.

BURROWS - holes in and around your property, such as under floors, sidewalks, dirt banks and basements.

GNAWINGS - around doors and window seals, plumbing and electrical outlets and food packages.

DROPPINGS - look behind objects near walls and in places seldom cleaned or disturbed. Droppings are a sign of possible places to bait.

TRAILS - look for greasy areas along floor boards, stairs, pipes and beaten paths through yards.

It's The Law!

Baltimore City residents must keep their property clean. **Unsanitary** practices could result in citations being issued with **finest** ranging from **\$25.00** to **\$500.00**.

For further information or assistance, call 311.

RECREATION AT RESERVOIRS

Safeguarding Our Reservoirs

We believe, and most of you agree, that Baltimore City has the best-tasting, clearest, purest drinking water in the country. The Baltimore City Department of Public Works (DPW) is committed to keeping it that way. DPW has stewardship of the watersheds of the Loch Raven, Liberty and Prettyboy Reservoirs. The watersheds protect these vital supplies of our drinking water and provide a natural environment for recreation.

Altogether, DPW oversees 477 square miles of watershed. With the Maryland Department of Natural Resources, the city works to identify species of fish, aids in documenting natural reproduction and helps with stocking in certain areas. Within the three reservoirs, 44 species of fish, from Banded Killifish to Yellow Perch, can be found.

Boating and fishing on our reservoirs are favorite pastimes for many and call for special responsibilities by participants. Every year DPW publishes a booklet with useful information for boaters and anglers. For more information or to order a copy of the **2006 Pocket Guide to Boating and Fishing**, please contact: **Reservoir Natural Resources Section, 5685 Oakland Road, Eldersburg, Maryland, 21784-6828**. The general boating information line is **410-795-6150**.
